

## AUDIO NEWS REPORT

### **Tool on USB Web site helps farmers improve their sustainability**

The United Soybean Board (USB) encourages U.S. soybean farmers to try the Fieldprint Calculator, a free tool available on the USB Web site, [www.unitedsoybean.org](http://www.unitedsoybean.org). USB remains committed to helping the U.S. soybean industry become more sustainable and informing farmers of the importance of sustainability.

The Fieldprint Calculator analyzes the use of natural resources and inputs in tabulating a farm's environmental "Fieldprint," and can show farmers how individual farm-management decisions affect the overall sustainability of their farm.

Click [here](#) to download an audio news report with Doug Goehring, Team Lead on USB's Sustainability Initiative and a soybean farmer from Menoken, N.D., talking about the role the Fieldprint Calculator can play in USB's sustainability efforts.
