#### **BIODIESEL POWERED SHUTTLES**

ISA sponsors the Campground Shuttle System, operated by the Clearfield Lions Club. The shuttles operate using soy biodiesel, a sustainable, environmentally-friendly and cleaner-burning fuel that decreases greenhouse gas emissions by up to 86%.

The Campground Shuttle System begins operations at 8 a.m. daily and concludes the day at approximately 11 p.m. during the 11-day Fair. Approximately eight Campground Shuttles run continuously throughout the 160-acre Campgrounds to Heritage Hill, looping every fifteen minutes.
