

## On-Farm Network® Corn Rootworm Beetle Survey Field Enrollment Form

The Iowa Soybean Association On-Farm Network® will conduct corn rootworm beetle trapping in fields throughout Iowa during 2019. Sampling will be conducted from mid-July into August and will consist of 4 sticky traps placed in a 200' line, read and replaced weekly. Growers who wish to participate must accurately report field location, planting date, previous crop, hybrid(s) and full list of included traits. Fields that will be sprayed with an insecticide or fungicide/insecticide combo before August 10 are not eligible. Growers will be notified if counts are extreme.

### GROWER INFORMATION

First Name:	MI:	Last Name:
Mailing address:		
City:	State: IA	ZIP:
Home Phone:	Mobile:	
Email:		

### CORN FOLLOWING CORN FIELD INFORMATION

Field Name:	Acres:	2019 Crop: CORN
County:	Township:	
Section:	Quarter Section: <input type="checkbox"/> NE <input type="checkbox"/> SE <input type="checkbox"/> SW <input type="checkbox"/> NW	
Landmark or GPS coordinates (Optional):		
Previous crop: Corn		
Planting Date:		
Hybrid(s)		
Trait package:		
Soil applied insecticide at planting: <input type="checkbox"/> NO <input type="checkbox"/> YES, Product -		

### CORN FOLLOWING SOYBEANS FIELD INFORMATION

Field Name:	Acres:	2019 Crop: CORN
County:	Township:
