

# Evaluation of Miravis® Neo in Corn Production

## PROJECT GOALS:

Miravis® Neo is a new fungicide developed by Syngenta. It contains a three-way mixture of azoxystrobin, propiconazole and Adepidyn®- a new fungicide mode of action. Early development work has shown that Miravis® Neo controls key diseases, increases yield, plant health and harvestability. The purpose of this research is to characterize the value of Miravis® Neo fungicide under Iowa farming conditions.

## WHAT WE NEED FROM YOU:

- Choose a field that has a history of disease pressure. Corn on corn rotations are encouraged.
- Apply Miravis® Neo according to the plot layout.
- Treatments
  1. No Fungicide.
  2. Miravis® Neo at 13.7 oz/A at the V5 growth stage followed by 13.7 oz/A at the VT growth stage.
  3. Miravis® Neo at 13.7 oz/A at the VT growth stage.
  4. Optional: Apply Miravis® Neo at 13.7 oz/A at the V5 growth stage only.
- Provide yield/management information after harvest.

## Suggested Plot Layout:

Suggested width of strip is one round of the combine.

### Treatment

-  No Fungicide
-  Miravis @ 13.7 oz/A at V5 fb VT
-  Miravis @ 13.7 oz/A at VT
-  Optional: Miravis @ 13.7 oz/A at V5 only
-  Not Plot

## WHAT ISA WILL DO FOR YOU:

We will provide:

- Enough Miravis® Neo product for the trial field.
- Imagery of the trial field.
- Scouting results on Miravis® Neo efficacy on corn diseases.
- A summary of trial results from your farm.
- An aggregated data summary for all similar trials combined.
